Note: Regarding color matching, dye-sublimation printing process uses a computer printer to generate a heat transfer to transfer the image onto fabric. Dye-sublimation printing machines use CMYK (Cyan Magenta Yellow Overcoating) colors, which differs from the more recognized CMYK colors in that the black is eliminated in favor of a clear overcoating. As a result, PMS inks cannot be matched exactly. They are only a reference point and an approximation. Factory will do it's best to match but cannot guarantee an exact color match. Disclaimer: Note please hand wash. Washing will influence imprint longevity.
