"CustomCut™" Full Color Custom Shape Removable Vinyl Stickers In Singles

Our CustomCut™ Sticker/Decals are made with a Professional Grade White 6 Mil Matte Vinyl Material. Each Sticker is individually kiss cut to the contours of your custom logo design.

No Die or Die Cutting Charges! They come in individual singles for easy distribution. CustomCut™ Stickers are a premium product and an upgrade to thin paper stickers which come on a roll and are harder to distribute. For indoor and outdoor use, water resistant and removable for up to one year. **Pricing includes up to a full color Photolmage® digital imprint.** All Stickers require a 1/8" white border around the artwork design.

CustomCut™ stickers are sold by the square inch. To calculate the total number of square inches needed for your design, simply multiply the Length times the Width of your sticker size including an additional 1/8" white border. Please make sure your art file indicates the sticker die cut outline with the 1/8" white border so we understand how you want the finished sticker to look. Please check our website for complete art instructions. Not intended for children 12 years and younger.

Variations in print substrates/materials make it impossible to exactly duplicate PMS colors on Innovation Line products. Color variation cannot be considered a defect due to ink, lighting, and material variations. Innovation Line is not responsible for any color variation. In screen printing pad printing, Sublimation or transfer process exact color matches cannot be achieved. Regarding color matching, dye-sublimation printing uses a computer printer to generate a heat transfer to transfer the image onto fabric. Dye-sublimation printers use CMYK (Cyan Magenta Yellow Overcoating) colors, which differs from the more recognized CMYK colors in that the black is eliminated in favor of a clear overcoating. As a result, PMS inks cannot be matched exactly. They are only a reference point and an approximation. Laser engraving appears on actual item as tone on tone (as the laser engraving uses the laser to burn through the surface), on clear acrylic it appears white frost, on a proof laser engraving is most often shown in gray color. Imprint will shift slightly when printed or lasered. Each product is manufactured and printed individually, so 3/16" movement in logo alignment may result and cannot be considered a defect in printing. 1007
