Disclaimer: Machine Wash Cold. Do Not Bleach or Turnble Dry (Line Dry). Do Not Iron or Dry Clean. Some Shrinkage is considered normal after washing. With flatbed dye-sublimation sock printing, only one side of a sock is printed at a time. Each sock runs through the sublimation machinery twice to be printed on both sides (the front and back). The printing on the edges of socks overlap slightly resulting in a fine imprint line running the length of each sock (this fine line is more visible with lighter colored imprints). We advise keeping loose 'a way from sock (this fine line is more visible with lighter colored imprints). We advise keeping loose 'a way from sock edges to avoid loops being cut off. Additionally, small creases in socks may occur during printing which will appear as small white spaces. These conditions are unavoidable and are not considered defects. Please note all socks are printed in their original manufactured state not stretching. As the sock stretches when worn the logo will distort and color will lighten up. The amount of distortion and color change depends on the amount of stretching and is not considered a defect. It is not uncommon in some cases for print to become illegible and the color show white lines proportionally as stretching increases however this is not considered a defect.
