Specify Promo #E5230 to receive special pricing at time of order placement as it cannot be applied later. This offer may not be combined with any other promotion, discount, coupon and/or special column pricing. Expires 2/28/2026

Disclaimer: Machine Wash Cold. Do Not Bleach or Tumble Dry (Line Dry). Do Not Iron or Dry Clean, Some Shrinkage is considered normal after washing. With flatbed dye-sublimation sock printing, only one side of a sock is printed at a time. Each sock runs through the sublimation machinery twice to be printed on both sides (the front and back). The printing on the edges of socks overlap slightly resulting in a fine imprite line running the length of each sock (this line line is more visible with lighter colored imprints). We advise keeping logges 16" away from sock adges to avoid logge being und for discharges in socks may occur during printing which will appear as small white spaces. These conditions are unavoidable and are not considered defects. Please not all and ordor change depends on the amount of stretching and ordor change depends on the amount of stretching and is not considered a defect. It is not uncommon in some cases for print to become illegible and the color to show white lines proportionally as stretching increases however this is not considered a defect. Credits or returns not accepted. (Credits or returns not accepted.) #SOCK14 Due to threads extending to create Fuzzy sock lock, a flat depressed box beneath the logo allows fine details to appear strong and bold and thus protects the integrity of all details. Depressed underlying box color blends into sock material/background color. Also, some logo/imprinting cracking is unavoidable and none of these are considered defects. Note:
