Specify Promo **#E4774** to receive special pricing at time of order placement as it cannot be applied later. This offer may not be combined with any other promotion, discount, coupon and/ or special column pricing. Expires 12/31/2023

Disclaimer: Machine Wash Cold. Do Not Bleach or Tumble Dry (Line Dry). Do Not Iron or Dry Clean. Some Shrinkage is considered normal after washing. With flatbed dye-sublimation sock printing, only one side of a sock is printed at a time. Each sock runs through the sublimation machinery twice to be printed on both sides (the front and back). The printing on the edges of socks overlap slightly resulting in a fine imprint line running the length of each sock (this fine line is more visible with lighter colored imprints). We advise keeping logos 1/2" away from sock edges to avoid logos being cut off. Additionally, small creases in socks may occur during printing which will appear as small white spaces. These conditions are unavoidable and are not considered defects. Please note all socks are printed in their original manufactured state not stretching. As the sock stretches when worn the logo will distort and color will lighten up. The amount of stretching and color change depends on the amount of stretching and is not considered a defect. It is not uncommon in some cases for print to become illegible and the color to show white lines proportionally as stretching increases however this is not considered a defect. Credits or returns will not be accepted. (Credits or returns will not be accepted). #SOCK14 Due to threads extending to create Fuzzy sock look, a flat depressed box beneath the logo allows fine details to appear strong and bold and thus protects the integrity of all details. Depressed underlying box color blends into sock material/background color. Also, some logo/ imprinting cracking is unavoidable and none of these are considered defects. Note: returns or invoice adjustments will not be made. 12/20/20
