Setup Charge: 60.00 (G), price includes a full color, full bleed sublimation imprint over the entire sock, front and back. Base color is white. Exact color match cannot be guaranteed with sublimation printing. **Email Proof Charge:** 7.50 (G), add 2 days to production time. **Repeat Setup Charge:** 32.50 (G). **Standard Production:** 10 Days after all approvals. Due to the nature of flatbed dye-sublimation, product will have a “seam” on each edge. On occasion there may be little creases and crevices in the fabric, this is not considered a defect. Creases could prevent color or imprint from printing inside the small fabric crease, resulting in small white spaces.

Packaging: Polybagged per pair.

Material: 90% polyester, 7% cotton, 3% Elastane.

Weight: 15 lbs/100 pcs.

Specify Promo #E5223 to receive special pricing at time of order placement as it cannot be applied later. This offer may not be combined with any other promotion, discount, coupon and/or special column pricing. Expires 9/30/2025. All prices are in US Dollars.

Disclaimer: Machine Wash Cold. Do Not Bleach or Tumble Dry (Line Dry). Do Not Iron or Dry Clean. Some shrinkage is considered normal after washing. With flatbed dye-sublimation sock printing, only one side of a sock is printed at a time. Each sock runs through the sublimation machinery twice to be printed on both sides (the front and back). The printing on the edges of socks overlap slightly resulting in a fine imprint line running the length of each sock (this fine line is more visible with lighter colored imprints). We advise keeping logos ½” away from sock edges to avoid logos being cut off. Small creases in socks may occur during printing which will appear as small white spaces. These conditions are unavoidable and are not considered defects. All socks are printed in their original manufactured state not stretched. As socks stretch when worn the logo will distort and color will lighten. The amount of distortion and color change depends on the amount of stretching. It is common in some cases for print to become illegible and the color to show white lines proportionally as stretching increases however. Socks are intended for individual use and they cannot be lined up for identical comparison as it is not possible for each pair of socks to mirror one another within print runs. These are not defects and credits or returns will not be accepted. Material Color: Material color may vary from shipment to shipment and dye lot to dye lot. The physical color of an object depends on how it absorbs and scatters light. No electronic device can truly capture actual color and in most cases the way each person experiences color is entirely subjective. Innovation makes no claims regarding color and if material color is critical to your customer, samples must be ordered in advance. Credits will not be made nor returns accepted for issues regarding material colors.0825
